

## PRESS RELEASE

Santander, January 11<sup>th</sup> 2017

### **SANTANDER TELEPORT leads the ranking of the Fast 20 Top Operators 2017**

Santander Teleport has once again made it to the Fast 20 Top Teleport Operators rank published by the World Teleport Association (WTA), this time to lead this list.

Each year, WTA publishes the world's only rankings of companies that operate teleports for commercial purposes. The Fast Twenty ranks all teleport-operating companies based on year-over-year revenue growth. Santander Teleport, located in Spain, was the fastest of the fast with a 37% year-over-year growth rate.

"Santander Teleport is delighted to lead the rank of this prestigious list, competing in the same league as some of the largest companies in the satellite industry and showing a healthy and sustainable growth. We thank our customers, partners and friends, and we take pride of our fantastic team" said Carlos Raba, Managing Director of Santander Teleport.
